

Providing Environmental,
Engineering & Survey
Solutions since 1997

Green Seal Environmental

Who We Are

For nearly three decades, Green Seal Environmental has partnered with public and private sector clients to deliver innovative environmental and engineering solutions. From land surveying and civil engineering to environmental compliance and solid waste facility services, GSE combines technical expertise, responsiveness, and experience to successfully move projects from concept to completion.

Survey

THE GREEN SEAL ADVANTAGE

One coordinated team handles engineering, surveying, environmental, permitting, and solid waste work from start to finish, so clients have a single point of contact instead of a chain of subconsultants. Municipal, commercial, industrial, transportation, and energy & waste management clients rely on GSE for practical, cost-effective solutions and clear guidance through complex, heavily regulated projects.

Services include:

Engineering

Providing site development, design, permitting, stormwater management, utility design, and construction support for commercial, industrial, and other infrastructure projects.

Solid Waste

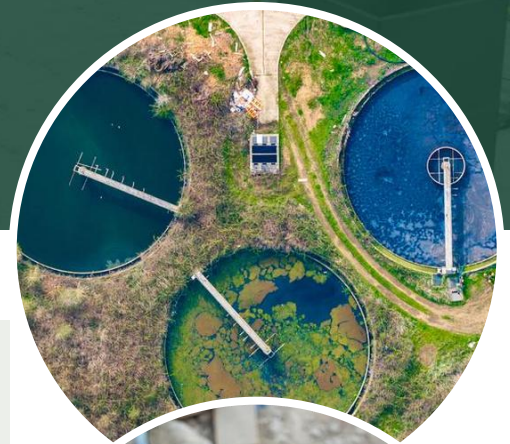

Supporting solid waste and recycling facilities with planning, design, permitting, compliance inspections, environmental monitoring, and long-term operational solutions.

Environmental

Helping clients manage environmental risk through site assessments, assessments, permitting, compliance, remediation, and due diligence diligence services.

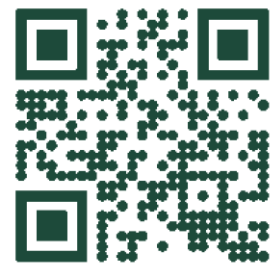

Survey

Delivering land surveying, reality capture, and 3D laser scanning services using the latest technology and data collection methods.

Why Clients Choose Green Seal:

- ✓ Nearly 30 Years of Experience
- ✓ Multidisciplinary Team Under One Roof
- ✓ Advanced Survey & Reality Capture Technology
- ✓ Trusted by Clients & Regulators throughout New England
